SERPENS

OPTICAL BOOST/ COMPRESSOR

The Serpens is not your traditional boost/optical compressor pedal. Effectively evening out playing dynamics to your liking and remaining as silent as possible when not playing, the Serpens retains all of your guitar's unique character while adding its own slightly darker charm to your tone.

VOLUME

Controls the loudness of the output signal

BLEND

Turn clockwise to blend in more compressed signal into the mix

SENS

Turn clockwise to make the compressor sidechain more sensitive to your playing

GAIN

Turn clockwise to add more headroom and possible amount of compression
