NOODLES 麺

The Noodles is a 3-band fixed-frequency active filter. That's a mouthful. Not an EQ, not a boost, a little bit of both. A total of 64 different unique filter combinations to add flavor to your tone. Pick between 3 separate frequencies for each band - all carefully selected through experimentation and many prototype iterations. Each band features a knob to control the amount of gain. The output of all 3 bands is mixed equally with your dry signal.

BASS (UDON)

Controls the amount of added bass frequencies according to the selected mode. The bass EQ features an active low-pass shelf filter.

MIDS (RAMEN)

Controls the amount of added mids frequencies according to the selected mode. The mids EQ features an active band-pass filter.

TREBLE (SOMMEN)

Controls the amount of added treble frequencies according to the selected mode. The treble EQ features an active high-pass shelf filter.

I/II/III

Cycles through the different frequency modes for each band, the LED lights indicate the active mode.

Bass Mode I: 40Hz
Bass Mode II: 100Hz
Bass Mode III: 280Hz

Mids Mode I: 400Hz - 2.8KHz
Mids Mode II: 800Hz - 2KHz
Mids Mode III: 1KHz - 1.5KHz

Treb Mode I: 2.8KHz
Treb Mode II: 4KHz
Treb Mode III: 6KHz
